

FIRST CALL DOCUMENT

URL: https://dietghar.in/diet/Admin/first_call/7

The screenshot shows the 'Add First Call' form in the DietGhar Admin interface. The form is a 5-step stepper. Step 1, 'Basic Details', is active. It contains the following fields:

- Client Name*: Shubham Kansal
- Mobile No*: 9876543210
- Plan Name*: Diet Essential Plan
- Age*: 1989-01-01
- DOB: You are 32 years 5 months 17 days old.
- Height*: 5'9"
- Weight*: 100 lbs

Navigation buttons: Previous, Next

This is the first step by the Admin to any client. This small form contains all extra information which is needed to prepare the chart. Admin needs all data that needs to be processed to save all the information of the client and complete the user profile.

This stepper works in a way that 5 tabs on the screen when we press next changes.

The screenshot shows the 'Add First Call' form in the DietGhar Admin interface, specifically the 'Lifestyle' step. The form contains the following fields:

- Highest Weight Ever Recorded*: 102 lbs
- Occupation*: Housewife
- Breakfast time*: 10:00 AM
- Dinner time*: 7:30 PM
- Wake Up time*: 8:00 AM
- Lunch time*: 2:00 PM
- Sleep time*: 11:00 PM
- Food Allergy*: Add Allergy
- Your Favourite food you crave for*: Add Likng
- Any Previous Diet followed*: Select Previous Diet
- Food Preference*: Select Food Preference
- How many times you eat out in a week*:

Navigation buttons: Previous, Next

All these details are filled by the Admin.

In the third Step you can see Thyroid is Yes but it does not display the type of thyroid in this form that needs to be entered in this. Please insert the Type of Thyroid and Diabetes it does not reflect on its own. Same with diabetes- please insert the type of Diabetes when it was selected by the client.

REST seems OK.

The validation will be completed by the UI developer ASAP.

Step 4

When the start date is entered then as per the days in the plan the end date shall be displayed automatically.

Points to Remember: Here in this final step the **Start Date** is very important this will control when the diet chart will be displayed, as this date recognises when the client will start his/her diet chart. All further functions of the client will be connected by this Date.

When this form is submitted it gets updated but nothing shows up so, the UI designer will add a Modal pop up showing the first call is completed and then the client will show up in Chart preparation tab on the dashboard (Plans to be sent).
